Equations should be indented and numbered consecutively on the right margin using Arabic numerals in parentheses. For simple in-line formulae, please present them in a format that preserves the spacing, e.g. express fractions as X/Y . Please display the mathematical expressions such that it is clearly distinguished from the text, e.g., italicize the variables, express the exponential function in $y = \exp(x)$ instead of $y = e^x$, etc.

Tables should be numbered with Arabic numerals. Each table embedded in the manuscript should have a title followed by a descriptive legend. The caption of the table and the headings of columns and rows should be clear and reasonable. Footnotes to the table should be indicated with superscript lowercase letters and placed below the table body.
